The Future is Wireless.

The new DUO Wireless-Ready Sensor delivers unparalleled image quality whether using handheld or mounted X-rays, and whether direct-connected or wireless.*

*Connect to Air2Zed system,
sold separately

†No purchase necessary

Works With Your Software

DUO Sensors involve a simple setup, and work either natively or via TWAIN with most major software brands, including Dentrix Ascend, Carestream, Dexis, Eaglesoft and more.

Crystal Clear Images

Within the durable casing of the DUO Sensor is our Advanced CMOS Technology, which utilizes state of the art coupling technology and provides highly detailed images. The sleek scintillating material allows for the sensor to have a thin profile, and produces the most effective light conversion and overall image capture in the market today.

Peace Of Mind

When you purchase equipment for your practice, you want to know your investment is protected. Your DUO Sensor comes with a standard 2 year warranty with affordable extended warranty options to fit your needs.
